

EVENT CARDS

Event cards are drawn at the start of every turn and its effects last for the whole turn.

Each event card can have the following:

- 1. Ally effect
- 2. Assassin effect
- 3. Region effect

Conquer attempts require 1x this turn,

Ally effect

enemies do not unconquer the tiles

Assassin effect

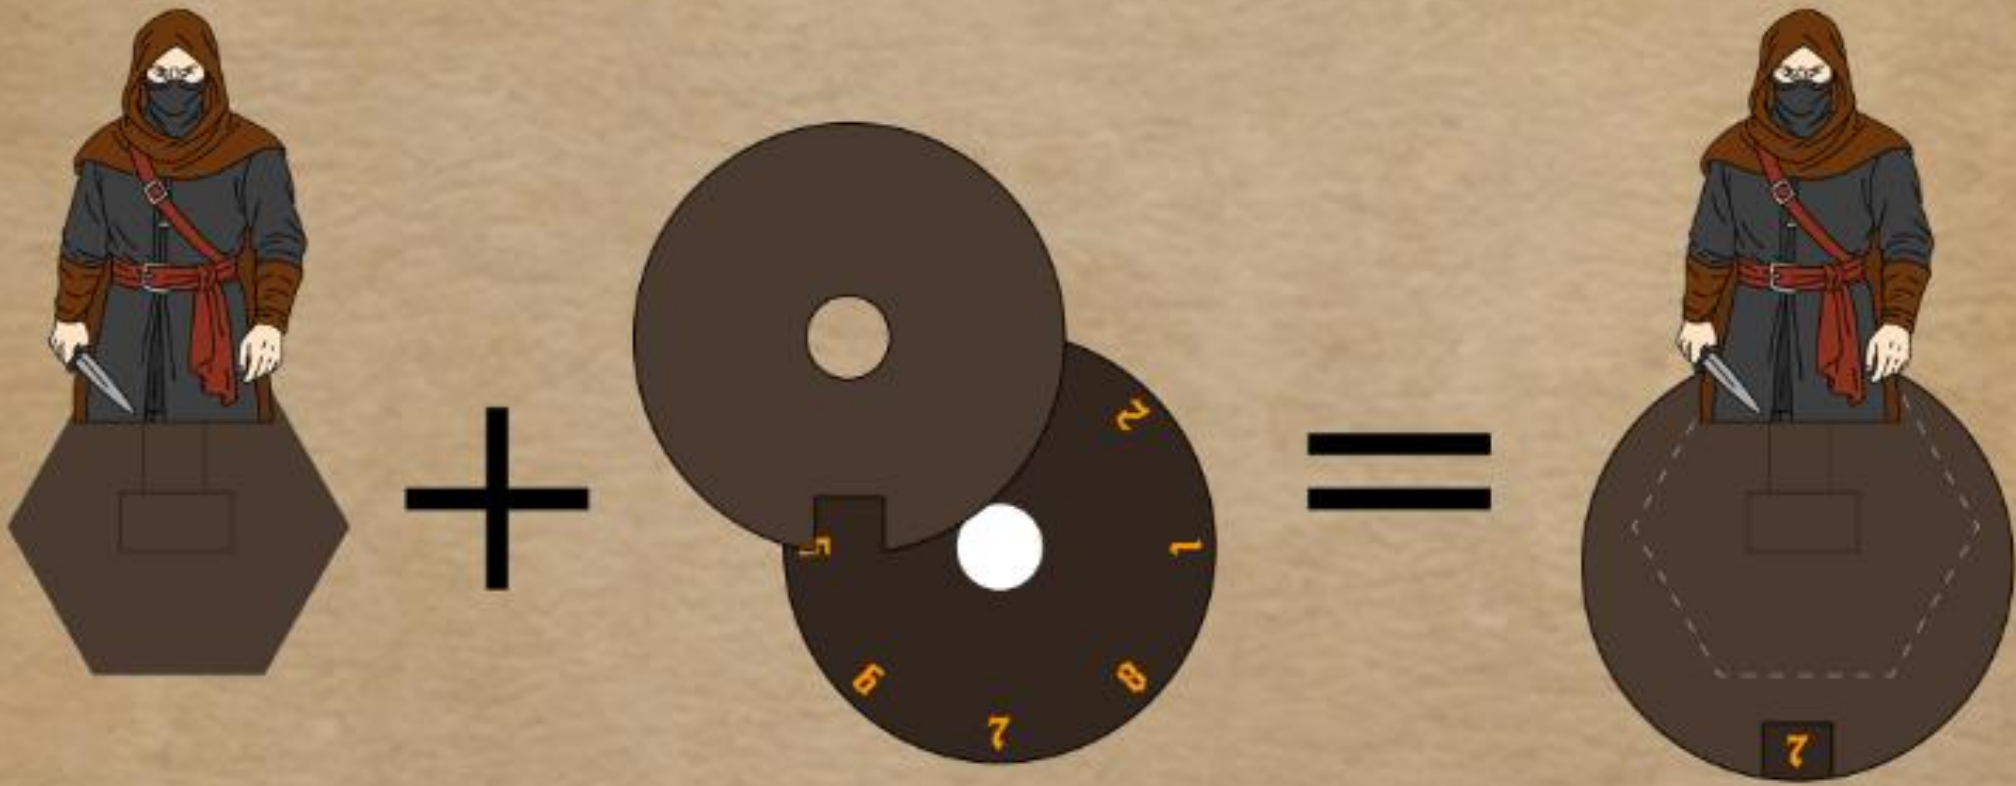

Travelling on east zone will -1 each AP used

Region effect

TURN COUNTER

To use the turn counter, assemble to counter separately from the assassin before placing it beneath him.

Basic Strategies

BASIC STRATEGIES

Some basic strategies the player can try employing:

- 1. Conquer as many tiles as possible from the beginning, gaining distance and strategically routing the assassin away from conquered tiles to gain the maximum number of supplies.
- 2. Place your prince away from paths connecting the assassin to conquered territories to ensure conquer efficiency.
- 3. Use your allies to form formations of your choice to always be prepared for combat initiation.
- 4. Unable to stop the assassin? Place one of your knights between the paths connecting your conquered territories and the assassin to block damage.
- 5. Keep a close look out for your health. Make sure to unlock and use defensive formations when low on health.
- 6. Constantly remembering to upgrade characters and unlock formations is key to getting stronger, faster.
- 7. Ensure to plan your routes to gain the most efficiency out of the passive effects such as heals or damage buffs.

Game Components

INTRODUCTION

Conquest is a solo positional strategy game. Trapped in a time loop, you have 8 days to incapacitate the assassin hunting you before your ascension. Seize territories, plan your moves carefully, and turn the tide in your favor to break the cycle and secure your future.

POINT OF INTERESTS

Point of Interests are denoted by a special territory icon.

Camp Point of Interest

Regular territory

Though all territories are able to be conquered, only Point of Interests have special effects when conquered.

Region-wide attack: 3 damage once per turn

All Point of Interests are as listed:

North	South
17. Stronghold	23. Camp
15. Watch Tower	29. Mortar Stronghold
East	West
7. Fishing Port	19. Camp
9. Stronghold	21. Watch Tower
10. Camp	25. Stronghold

All POIs & territory reference number

Board

THE GAMEBOARD

The gameboard is a map of 29 territories, split into 4 regions. Each region is depicted by a season color.

Each territory has a reference number.

Territory effects are denoted by the legend to the left of the map.

Regional territory effects

Some territories are connected by red lines. These territories don't have additional nodes in between to travel to

Each territory is linked together by roads.

Each node between them costs 1 Action Point (AP) to travel to.

Special territories connected with red lines cost more AP to travel to.

Travelling from territory 20 > 2 requires 3AP

Travelling from territory 11 > 29 requires 3AP

Upgrading

UPGRADING CHARACTERS

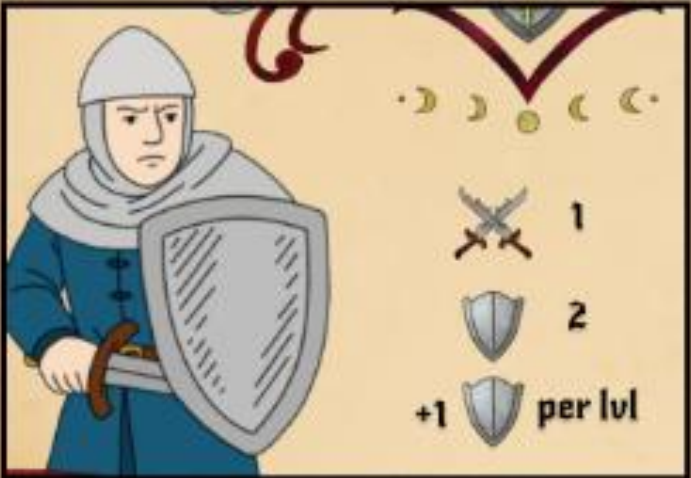

At the end of every turn, add up all the supplies gathered during the 3 phases.

These supplies are used in 3 ways.

1. Use 1 supply to heal 5 health

2. Unlock new formations for stronger attacks/defenses

3. Level up your knights for higher stats & effects

Character base stats

Level counter

Level upgrades

Place tokens on the paths chosen to signify the upgrades made.

Example of Upgraded Formations

ASSASSIN COMBAT

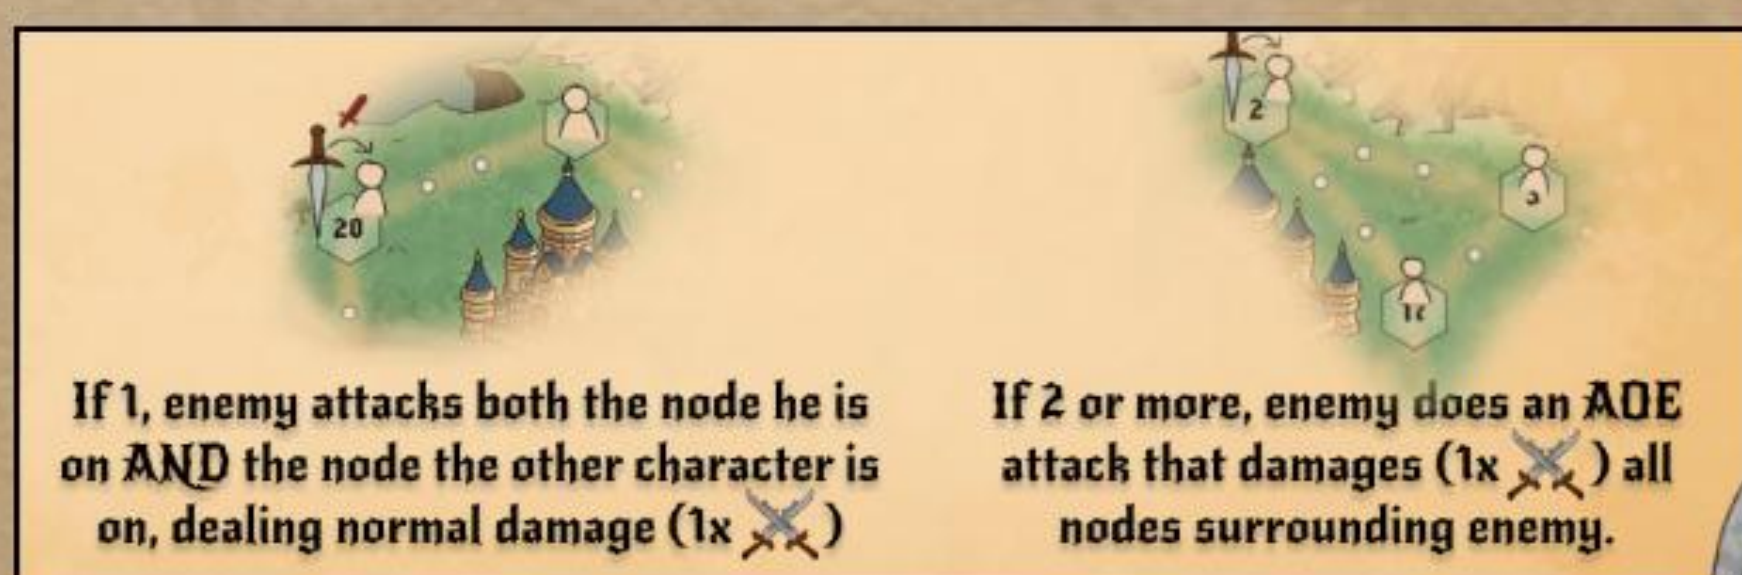

Enemy attacks are conditional, dependent on how many player characters are surrounding the enemy at the moment.

If not surrounded by any, the assassin does a heavy attack (2x damage) on the territory he is currently on.

If surrounded by 1, the assassin attacks both the territory he is on AND the territory the other character is on, dealing normal damage (1x damage)

If surrounded by 2 or combat initiated by combat formation, the assassin does an AOE attack that damages (1x damage) all territories surrounding the assassin.

Check the Assassin character card for more information.

Formation Examples

Allies Defense Formula = (Combined Defense of Participating allies x multiplicative bonuses) + additive bonuses

Damage formula = ((Enemy attack x attack multiplier) - (Total defense of allies)) x Number of characters hit

Conquering

CONQUERING TERRITORIES

When the prince/knights are on territories, they are able to spend AP to attempt at conquering territories.

Conquering territories is as follows:

- Each attempt will require 1 AP
- A d20 is rolled and the base Difficulty Class (DC) for conquering is 10.
 - Conquering bonuses are attained by levelling up your knights.
- Conquering a territory gives you +1 supply immediately.
 - Holding that territory till end of turn gives you a bonus +1.
- Conquered territories are reset at the end of each turn.
 - Excludes strongholds

Conquered Stronghold

Conquered Territories

Strongholds can ONLY be conquered by the prince.

He cannot conquer other territories and the same rules for conquering apply. The strongholds do not give supplies when conquered but also do not get reset. Visiting these conquered strongholds regenerate your health by +5.

If the assassin passes through any conquered territories, he will un-conquer them immediately.

Initiating fights on conquered territories will also cause them to un-conquer.

Assassin moves and attacks prince & knight

Territory 6 gets un-conquered after combat

In this game, you play as the prince of your kingdom. You will be the one actively traversing the map to conquer land.

Prince

Base health: 30

Base attack: 1

Base defense: 2

During each phase, you choose where to leave your two allies as you traverse the land. After which, you can choose from any of your previously visited locations to end the phase on.

At the end of each turn, you collect resources which can be used to upgrade your allies or unlock new formations.

As the prince, only you are able to conquer strongholds.

To recover your health, you can visit conquered strongholds/camps OR spend 1 resource for 5 health.

Assassin

Base health: 99

Base attack: 10

Base defense: 5

The assassin will move 3 territories per phase, only moving 4 territories at night.

To determine the assassin's movement, find the shortest path in terms of territories to the prince.

The assassin has an attack list that determines what attack it deals to the player.

Use the counter to track the health of the assassin.

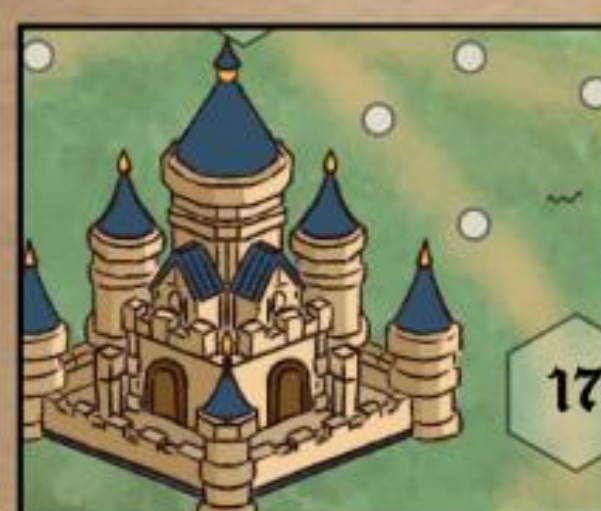

Assassin Health Counter

Setup

SETUP

Choose 1 of the 4 strongholds to begin your journey at. This will be the base of your operations.

Based on which stronghold you chose, the assassin will spawn relative to your position.

North Stronghold

Assassin Spawn

East Stronghold

Assassin Spawn

South Stronghold

Assassin Spawn

West Stronghold

Assassin Spawn

Vanguard Captain
Base attack: 2
Base defense: 1

The Vanguard Captain is the main line of offense. Invest in him to get the most out of the retribution path formation. Apart from attacking, he is able to help his prince conquer territories.

To upgrade the Vanguard Captain, you will require varying numbers of resources as stated on his card.

Level counter

For each level increase, the Vanguard Captain receives a bonus of +1 damage to his base attack on top of his level bonuses.

Shield Warden
Base attack: 1
Base defense: 2

The Shield Warden is the main line of defense. Invest in him to get the most out of the preservation path formation. Apart from attacking, he is able to help his prince conquer territories.

To upgrade the Shield Warden, you will require varying numbers of resources as stated on his card.

Level counter

For each level increase, the Shield Warden receives a bonus of +1 defense to his base defense on top of his level bonuses.

How To Play

HOW TO PLAY - 1 TURN

Start the game with 3 supplies. Place your prince and assassin at their respective territories. Start the assassin's counter at 8. You have to complete the game before the turn counter hits 8 again or else the game is over. Draw an event card, this card will be in effect for the whole of this TURN

Morning Phase:

1. Turn the phase counter to morning
2. The Prince will receive 10 Action Points (AP) which can be spent on traversing the map and attempting to conquer nodes.
3. As the prince traverses the map, he can leave his 2 knights on any nodes/territories he passes through.
4. With the leftover AP, the knights can attempt to conquer territories they are at.
 - See Conquering (Page 10)
5. The prince can then choose any of his previously visited nodes from this phase to end on.
6. After the player finishes moving, the assassin will move 3 territories towards the prince.
 - See movement (Page 9)
7. The assassin un-conquers any territories that he passes through while moving.
8. If the assassin comes into contact with a friendly unit or is in an appropriate space in a retribution formation, combat begins.
 - See combat sections (Page 11-12)

Afternoon Phase:

1. Turn phase counter to afternoon.
2. Repeat steps 1-8 from morning.

Night Phase:

1. Turn phase counter to night.
2. Repeats steps 1-8 from morning, but the assassin moves 4 territories instead. He also does +2 increased damage
3. At the end of night phase, calculate the total number of conquered territories on the board(excluding strongholds) and receive +1 supply per conquered territory
4. Remove the conquer flags from all territories (excluding strongholds).
5. Choose to spend supplies on upgrading friendly knights, unlocking new formations or healing the Prince.
6. Decrease turn counter by 1, signifying end of 1 turn.

Morning Phase

Knight Flag

Prince Flag

Conquered Stronghold

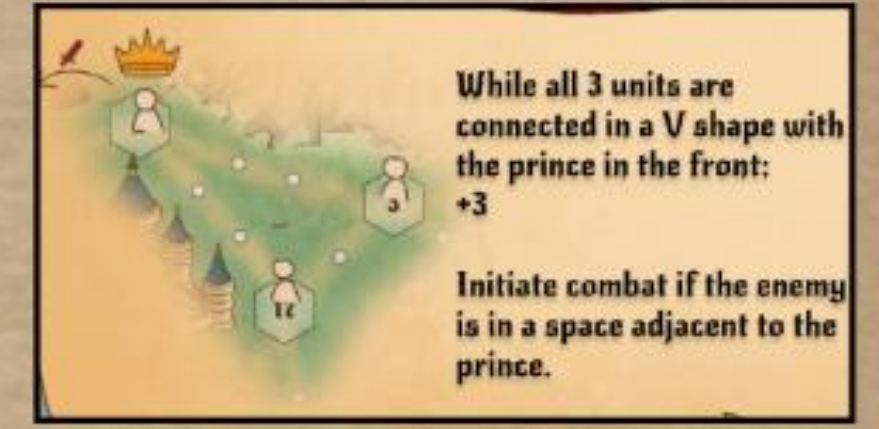

PLAYER COMBAT

Combat is initiated when the assassin and the prince/knights enter the same territory.

1. All characters on the territory including those in adjacent territories (linked directly via roads) enter combat
2. For each friendly character in combat, add their total attack together. Then, deal damage to the enemy minus the enemy defense.
3. Formation bonuses formed by arranging the friendly units in certain ways (shown on the Prince & formation card) can increase the Prince's stats.

Assassin enters combat with prince and knight

Prince combat formation

Retribution path formations have the ability to initiate combat.

For these formations, combat is initiated when the assassin steps into the appropriate space shown on the formation (adjacent node from the allies), rather than when the enemy collides with a friendly unit.

Check the respective character & formation cards for more information.

Formation Examples

Damage Formula = (Combined attack of Participating allies x multiplicative bonuses) + additive bonuses - enemy defense

Movement

TRAVERSING

Players traverse the map using Action Points (AP).

Each territory is linked together by roads. Each node between them costs 1 Action Point to travel to.

Territories connected with red lines cost 3 Action Points to travel to.

Travelling from territory 20 > 2 requires 3AP

Travelling from territory 11 > 29 requires 3AP

As the prince traverses the map, he can choose to leave his knights anywhere along the path he has taken that phase. He can then choose any node he passed through to end the phase on.

Prince traverses the map

Knights assigned to territory 2 & 20

Prince goes back to territory 17

The assassin ignores all AP costs and travels through territories, ignoring smaller nodes. The enemy moves 3-3-4 territories for each respective phase via the shortest possible route to the prince.

If the enemy enters the forest, he can only move 1 territory per phase.

Assassin requires 2 separate phases to enter and exit forest
